

Catholic Math League

St. Matthias School is participating in the Catholic Math League again this year. This program allows students in grades 3 to 8 the opportunity to compete against other students from around the country. Students are given a 30 minute multiple choice test based on their grade level or study of mathematics (Pre-Algebra, Algebra or Geometry).

The top place finishers from SMS will have their scores entered into the competition. After the fourth round of testing, awards are given out to the top students at each school, in each region and nationally.

Last year, we had several regional winners! The competition begins this month and will conclude in the spring. Good luck to all our students!
